IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

When buying a motorhome, camper van or urban vehicle (hereafter: motorhome), it is particularly important to choose the right layout and an appealing design. In addition, weight also plays an essential role. Family, friends, optional equipment, accessories and baggage – space must be available for all of these. At the same time, there are legal and technical limits to the configuration and load. Every motorhome is designed for a certain weight, which may not be exceeded during driving. For motorhome buyers, this raises the question: How should I configure my vehicle to accommodate passengers, baggage and accessories according to my needs without the vehicle exceeding this maximum weight? In order to make this decision easier for you, we provide you below with a few tips that are particularly important when selecting your vehicle from our portfolio:

1. The technically permissible maximum laden mass...

... is a value set by the manufacturer which the vehicle may not exceed. HYMER specifies a layout-related upper limit for the vehicle, which can vary from layout to layout (e.g. 3,500 kg, 4,400 kg). You can find the corresponding specification for each layout in the technical data.

	ML-T 570	ML-T 580
Standard chassis	Mercedes-Benz Sprinter 415 CDI	Mercedes-Benz Sprinter 415 CDI
Drive	Rear Wheel Drive / All Wheel Drive ○	Rear Wheel Drive / All Wheel Drive ○
kW (hp)	110 (150)	110 (150)
Length / Width / Height (cm)	674 / 222 / 290 ¹⁾	698 / 222 / 290 ¹⁾
Body width / Internal width (cm)	212 / 205	212 / 205
Standing height in living area (cm)	198	198
Wheelbase (mm)	3665	3665
Mass in running order (kg)*	2960 (2812 - 3108)*	2980 (2831 - 3129)*
Manufacturer-specified mass for optional equipment (kg)*	182	160
Technically permissible maximum laden mass (kg)*	3500	3500
Technically permissible maximum towable mass (kg)*	2000 ²⁾	2000 ²⁾
Permitted number of seats (including driver)*	4 ³⁾	4 ³⁾

2. The mass in running order...

... consists – to put it simply – of the basic vehicle with standard equipment plus a standard weight of 75 kg for the driver. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value stated in the sales documents. The permissible tolerance is $\pm 5\%$. The permissible range in kilograms is given in brackets after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, HYMER weighs each vehicle at the end of the line and informs your trade partner of your vehicle's weighing result for forwarding to you.

Detailed explanations on the subject of mass in running order can be found in the “Legal Information” section.

IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

3. The permitted number of seats (including driver)...

... is determined by the manufacturer in what is referred to as the type-approval procedure. This results in what is referred to as the mass of the passengers. For this, a standard weight of 75 kg per passenger (without driver) is calculated. Detailed explanations on the subject of mass of the passengers can be found in the “Legal Information” section

	ML-T 570	ML-T 580
Standard chassis	Mercedes-Benz Sprinter 415 CDI	Mercedes-Benz Sprinter 415 CDI
Drive	Rear Wheel Drive / All Wheel Drive ○	Rear Wheel Drive / All Wheel Drive ○
kW (hp)	110 (150)	110 (150)
Length / Width / Height (cm)	674 / 222 / 290 ¹⁾	698 / 222 / 290 ¹⁾
Body width / Internal width (cm)	212 / 205	212 / 205

Technically permissible maximum laden mass (kg)*	3500	3500
Technically permissible maximum towable mass (kg)*	2000 ²⁾	2000 ²⁾
Permitted number of seats (including driver)*	4 ³⁾	4 ³⁾

4. The manufacturer-specified mass for optional equipment...

... is a value set by HYMER per layout for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum pay-mass due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle.

Detailed explanations on the subject of the effects of the tolerances on the minimum pay-mass and the payload can be found in the “Legal Information” section.

Excess weight (kg)*				2

5. The additional weight of optional equipment and packages...

... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the pay-mass. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the manufacturer-specified mass for optional equipment.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

STANDARD EQUIPMENT HYMER REDWOOD

	Redwood 600	Redwood 601

 ◆ On request (no extra cost) — Not possible □ Available in package

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the

subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

 ◆ On request (no extra cost) — Not possible □ Available in package

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the

subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the

subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

● Standard equipment ○ Optional equipment ▲ Mandatory △ Not known at the time of publication Further information from p. 42
 ◆ On request (no extra cost) — Not possible □ Available in package

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the

subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

PRICES AND TECHNICAL DATA HYMER GRAND CANYON S CROSSOVER

	Grand Canyon S CrossOver
Price a) £	119,950.-
Standard chassis	Mercedes-Benz Sprinter 419 CDI
Drive	All Wheel Drive
kW (hp)	140 (190)
Emission standards	Euro VI-E
Tyre size	245/75 R16 C
Length / Width / Height (cm)	593 ¹⁾ / 206 / 285 ²⁾
Roof type	Sleeping roof O
Standing height in living area (cm)	192
Wheelbase (mm)	3665
Mass in running order (-/+ 5%) (kg)*	3194 (3034 - 3354)*
Manufacturer-specified mass for optional equipment (kg)*	351
Technically permissible maximum laden mass (kg)*	3880
Technically permissible maximum towable mass (kg)*	2800 O ³⁾
Permitted number of seats (including driver)*	4 ⁴⁾
Bed dimension: Rear bed L x W (cm)	195 x 135
Bed dimension: Central bed L x W (cm)	156 x 74 - 43 O
Bed dimension: Sleeping roof L x W (cm)	200 x 122 O
Berths	2 - 4 O
Fridge volume (freezer compartment) (l)	90 (6,5)
Standard heating	Diesel warm air, 6 kW
Gas bottle storage (Filling weight)	1 x 6kg
Total fresh water tank capacity (l)	100
Fresh water tank in driving filling level (l)	20
Waste water tank (l)	85
Battery capacity (Ah)	4x80 Ah (LFP)
Sockets: 230 V/12 V/ USB	4 / 3 / 2

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

STANDARD EQUIPMENT HYMER GRAND CANYON S CROSSOVER

Chassis / Weight variants	
Mercedes-Benz Sprinter 3.88 t - 419 CDI - 140 KW/190 hp - Euro VI-E	●
Basis	
Permanent All Wheel Drive incl. LED rear lights	●
9G-TRONIC automatic transmission incl. Hold function (x19 CDI)	●
93 l fuel tank	●
22 l AdBlue tank	●
Adaptive Brake Light	●
Exterior mirror electrically foldable	●
Electrically adjustable and heated exterior mirrors	●
Electric closing aid for sliding door, RH side	●
Comfort suspension chassis (vibration absorbers, stabilisers, shock absorbers)	●
Chrome grill	●
LED High-Performance headlights	●
Fog lights with cornering light	●
Front bumper as well as grill frame painted in vehicle colour	●
LED Daytime Running Light integrated in headlights	●
Reinforced front axle	●
Heat-insulating glass with tinting strip on windscreen	●
Windscreen made of laminated glass	●
Heated windscreen	●
16" steel rim (black) with studded tyres (All Terrain)	●
Electric cab windows	●
Electric parking brake	●
Electric immobilizer	●
Driver and passenger airbag	●
Belt warning device "Unfastened seat belt"	●
Grab handle for entry, sliding door	●
Trailer hitch pre-installation	●
Fully automatic climate control THERMOTRONIC	●
Shelf for smartphones incl. wireless charging with charge level indicator	●
Keyless Start (start-stop button for comfortable engine start)	●
Hinged lid for central storage compartment on the dashboard	●
Dashboard charging pack (2 USB-C connections with 5 V as well as one additional 12 V socket)	●
Leather steering wheel (automatic transmission only)	●
Steering wheel, height and tilt adjustable	●
Multifunctional steering wheel	●
Open shelf cockpit passenger side	●
Parameterisable special module for controlling retrofitted electronic add-on parts	●
Sun visor for cab seats, swivelling	●
Warm air auxiliary heating, electric	●
Central locking with remote control	●
120 km/h speed limit (MD3)	●
ABS (Anti-lock Brake System) / ASR (Anti-Slip Control) / EBV (Electric Brake Force Distribution) and ESP (Electric Stability Program)	●
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons	●
Outside temperature display	●
Attention Assist	●
Hill Start Assist	●
ESP with Brake Assist (BAS), ABS, ASR, EBV	●
High Beam Assist	●
Headlight range adjustment	●
Rain sensor	●
Crosswind Assist	●
Power steering	●

Cruise Control incl. steering wheel multifunction buttons	●
Blind Spot Assist	●
Traffic Sign Assist	●
Metallic: Tenorite grey	●
Body	
Optimal heat and noise insulation thanks to 16 mm closed-cell polyethylene foam in the wall area and 23 mm XPS insulation in the roof area	●
Insulated floor	●
Expandable rear door opening	●
Awning (anthracite) with dimmable LED illumination and adapter, 325 x 250 cm	●
Skylight in bathroom, 28 x 28 cm	●
Skylight in bedroom, 40 x 40 cm	●
Skylight in living room, 70 x 50 cm	●
Insulated aluminium framed windows	●
Design graphics: CrossOver	●
Electric off-road step (retractable) for more ground clearance	●
44" LED Light bar above cab	●
Engine / Underride protection	●
Outfitting	
Mercedes-Benz Comfort seat in living area fabric, height- and tilt adjustable, rotating, with 2 armrests and integral look	●
Front seating group with 2 integrated 3-point belts	●
All overhead lockers with Soft-Close feature	●
Comfort push locks with genuine leather loops on flaps and drawers	●
Folding table with possibility to enlarge	●
Pull-out bed climb incl. load compartment partition	●
Mosquito net pleated blind for sliding door	●
Pleated blackout cab blinds for front and side windows	●
Mosquito net and blackout blinds on all windows in the body construction (except bathroom)	●
Wall panel with multifunctional rail system at the seating group and kitchen for multiple use	●
Lashing rails with 4 adjustable eyelets	●
2 folding chairs and table, incl. fixation	●
Tool set (folding spade, axe) in rear storage compartment	●
Living and bedroom + lighting	
Side panelling in the bedroom with premium heat and sound-absorbing fabric lamination	●
Innovative sleeping comfort mattress with integrated disc spring system	●
Partitioning curtain between bed- and living room	●
LED reading spotlights with touch control (living area)	●
Ambient light system: Multiple level light system with dynamic and individual control of the illumination (incl. light temperature) as well as atmospheric base illumination	●
Fitted sheets made to measure for rear beds individually adapted to mattress	●
Living style collection "HOME" (2 cushions as well as utensil bag)	●
Kitchen	
Cooking/sink combination with glass cover (2-burner gas hob) and high-quality single-lever mixer tap	●
Deep drawers with Premium pull-outs incl. self-closing	●
Kitchen drawer with Soft close feature and cutlery insert	●
Expandable kitchen worktop	●
90 l compressor fridge (12 V or 230 V) incl. freezer compartment with excellent cooling performance and silent night mode	●
Bathroom	
Compact bathroom with door	●
Design folding washbasin (made of solid surface)	●
Shower head holder with suction cup	●
Cassette toilet with level indicator	●
Mirror cabinet with vanity mirror	●
Shower insert floor with cork surface	●
Mirror cabinet	●
Second toilet cassette incl. bracket	●
Installation & Technology	
6 kW Diesel warm air heating with 10 l warm water boiler, atmospheric pressure sensor (altitude kit) and 1,800 W electric bar heater	●
Indoor temperature sensor	●

LCD keypad for heating	●
HYMER Smart Battery System 2.0 - additional 3 x 80 Ah LFP (overall capacity 320 Ah)	●
Charging booster for safe charging of the habitation battery while driving (up to 70 A)	●
230 V external connection with earth leakage circuit breaker for 230 V & 12 V	●
7" touch display for convenient control and monitoring of smart vehicle features	●
HYMER Connect to control and monitor smart vehicle features via the HYMER Connect App. ⁷⁾	●
100 l fresh water tank, internal (20 l in driving position)	●
85 l waste water tank (fitted underfloor)	●
Level indicator for fresh water as well as waste water tank	●
Waste water tank, insulated and heated	●
Electric waste water drainage with dashboard switch	●
Water filter for fresh water system	●
Solar panel with solar charge controller (MPPT) and display, 1 x 95 W	●
Multimedia	
Audio pre-installation with 4 speakers	●
DAB Radio pre-installation	●
Parking package with 360° camera	●
SatNav & Smartphone integration for Mercedes-Benz MBUX	●
Fabrics & Furniture finishes	
Furniture finish: Ivy Green	●
Fabric combination: Indiana	●

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

EQUIPMENT LINES HYMER GRAND CANYON S XPERIENCE

Xperience Edition package

Metallic: Tenorite grey	●
9G-TRONIC automatic transmission incl. Hold function	●
Design graphics Xperience	●
Chrome grill	●
Fog lights with cornering light	●
Front bumper as well as grill frame painted in vehicle colour	●
16" alloy wheels (black matt) with all season tyres	●
SatNav & Smartphone integration for Mercedes-Benz MBUX	●
Leather steering wheel (automatic transmission only)	●
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons	●
Traffic Sign Assist	●
Living style collection "HOME" (2 cushions as well as utensil bag)	●
Fitted sheets made to measure for rear beds individually adapted to mattress	●
Ambient light system: Multiple level light system with dynamic and individual control of the illumination (incl. light temperature) as well as atmospheric base illumination	●
Shower insert floor with cork surface	●
HYMER Connect sensor package incl. 1x gas level sensor, 1x temperature sensor and 2x contact sensor	●
5G WiFi router with external antenna and Dual-SIM card slot (SIM card not included)	●
Excess weight Equipment line (kg)*	0
Package price (incl. VAT) £	

● Standard equipment ○ Optional equipment ▲ Mandatory △ Not known at the time of publication

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

PACKS HYMER GRAND CANYON S XPERIENCE

Package	Autonomy package LFP (GCS 600)	Autonomy package LFP (GCS 600 - sleeping roof)
HYMER Smart Battery System 2.0 - additional 3 x 80 Ah LFP (overall capacity 320 Ah)	●	●
Inverter 12 V to 230 V, 1,600 VA, 2,800 Watt peak power incl. 70 A additional charger	●	●
Solar panel with solar charge controller (MPPT) and display, 1 x 95 W	●	—
Solar panel with solar charge controller (MPPT) and display for sleeping roof, 2 x 95 W	—	●

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the

subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

HYMER ORIGINAL PARTS FOR YOUR CAMPER VAN

The HYMER Original Parts product range offers you solutions with added value that combine an excellent fit with harmonious design – and, of course, in the renowned HYMER quality. Whether you're looking for a solution to increase storage space in your vehicle or are interested in being more self-sufficient, we offer you tailor-made products for your vehicle.

The most versatile rack ever – Discover our Backrack+ components

Whatever you have in mind – bring all your leisure equipment with you and enjoy total flexibility on your travels. Diverse components make the HYMER Backrack+ exactly what it is – a guarantee for undreamt-of freedom on the road.

Make the space your own thanks to the range of modular accessories for the hook-on rail

HYMER Original Parts offers you accessories such as tablet holders, a universal shelf and spice racks for the integrated rail in the living area. Adapt the walls to perfectly suit your needs!

HYMER insulation and insect screen for the rear doors

Whether it's insulation or an insect screen, HYMER Original Parts offers you tailor-made solutions for the rear doors of your camper van. Thanks to a zip fastening system, you can still enter the vehicle without any restrictions.

A variety of safe solutions make your vehicle more secure

The safes for the passenger door (Fiat) or the seat console (Mercedes) from HYMER Original Parts are a secure place for you to store any valuables in your vehicle, leaving you to enjoy your holiday without a care in the world.

Tailor-made solutions for your sleeping comfort, awnings and bicycle racks, practical interior solutions and much more are also available from HYMER Original Parts. Take a look at the entire product range of HYMER Original Parts.

***NOTE**

Original accessories are not available direct from the factory, but are instead ordered and retrofitted exclusively via your HYMER dealer. The items are retrofitted to the vehicle following delivery from the factory and are not the responsibility of the manufacturer. Original HYMER parts and accessories that are retrofitted to a vehicle affect the payload capacity and axle loads.

Please note that the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original HYMER parts and accessories. For further information and explanations on the topic of weight, please refer to our weight information.

IMPORTANT NOTES

Abbreviations

ABS - Anti-lock Braking System
ASR - Anti-Slip Control - Traction Control
EDS - Electronic Differential Lock
ESC - Electronic Stability Control - ESP
HBA - Hydraulic Brake Assist
LAC - Load Adaptive Control
MSR - Engine Drag Torque Control
EBV - Electronic Brake-Force Distribution

Any modification in the Original factory condition of your vehicle may result in impaired driving and / or driving safety.

Please note that the standard equipment may be omitted when ordering optional extras. Individual package contents can sometimes be ordered individually. Since not all dependencies of optional extras can be listed here, please check with your HYMER dealer.

Accessories and original spare parts recommended by Hymer GmbH & Co KG are designed, developed and approved specifically for your vehicle. Your HYMER dealer supplies these products; he is informed about all the technical details and can perform the necessary work in the correct manner. Accessories, add-on, conversion or installation parts not approved by Hymer GmbH & Co KG may cause damage to the vehicle and impair road safety. Even if an expert's report, a parts BE or a type approval is available for these parts, there is no presumption of the proper condition of the product. Please understand that for any damage caused by non-approved products or not permitted changes, Hymer GmbH & Co KG CANNOT be made liable.

Weight figures are approximate values. The payload stated in the price list is reduced by the weights stated in the price list if optional extras are fitted.

Please note: The alternative engine options available at extra cost, as well as all other chassis options such as automatic transmission and air conditioning, result in a change in weight. The additional weight of the individual chassis and engine variants as well as chassis options are always indicated in the chassis-related optional extras in the individual optional extras lists.

Please note: A maximum of 2 child seats are permitted on the bench seat in the living area, provided the table is removed and securely stowed. On an L-shaped seating group with fixed table, only one child seat is permitted beside the window. For this purpose, the side cushion must be removed and the table top moved towards the centre of the vehicle and locked in place. Please observe the exact instructions in the corresponding operating instructions. Please ensure that you observe the prescribed axle load when installing special parts attached to the rear of the vehicle, such as a motorcycle rack or trailer hitch.

The prices indicated are only valid for optional extras if fitted with the production of a new vehicle. The retrofitting of certain optional extras is sometimes not possible or associated with considerable additional costs.

This price list includes the series status at the time of printing. Despite checking the contents, errors can not be excluded. In the course of the model year, we reserve the right to change equipment and to make product improvements. The layouts are partially shown with optional extras available at extra cost, these are not part of the standard scope of delivery.

The water installation system is at least state-of-the-art as of 07/2011 (EG directive 2002/72/EG).

Before signing a sales contract, please inform yourself about our current product and series status with one of our approved HYMER dealers.

All prices are non-binding recommended retail prices in GBP including the legally valid value added tax (VAT), freight from Germany, first registration fee and pre-delivery inspection. For deliveries after the 31st of December 2020 import duties may apply. These are not included in the price and are charged separately.

Changes in price, design and equipment are possible without prior notice.

a) This is a recommended retail price based on UK retail prices. Prices in other countries may differ due to currency conversion and country-specific VAT, fees and import duties. For the latest information, please ask a local dealer for the prices applicable in your country.

This price list supersedes all previous ones.

Collection / Pick-up:

Collection / Pick-up of your HYMER CamperVan at the factory is not possible.

FOOTNOTES

- 1) The length changes if optional extras such as trailer hitch, roof rails with rear ladder, Backrack+, bicycle rack, spare wheel incl. bracket on the outside of the rear wall, etc. are fitted.
- 2) Height changes if optional equipment such as SAT antenna, roof rails etc. is fitted. The standard radio roof aerial is not included in the overall height.
- 3) The specification is the maximum technically possible trailer load, taking into account the total towing weight of the possible chassis variants. The gross train weight and the associated trailer load may vary depending on the equipment/chassis variant and the technically permissible gross vehicle weight of the towing vehicle Up to 12% incline: The engine power is inevitably reduced with increasing altitude. From 1000 m above sea level and every 1000 m thereafter, 10% of the trailer load must be deducted from the trailer weight. Your HYMER dealer will be happy to calculate the towing capacity of your individual vehicle. Please do not hesitate to contact them.
- 4) The number of people specified will be reduced if the mass in running order increases. An increase occurs in particular if the engine version differs from the basic version, if optional extras are fitted and if a corresponding equipment variant is selected. Please check the weight information in the price list or consult your HYMER dealer to make sure that the technically permissible total mass is not exceeded and that there is sufficient loading capacity for persons and commodities. Please note the vehicles' weight balance.
- 5) The Fiat Ducato 3.5 t chassis (Light and Maxi chassis) with a gross vehicle weight of 3.5 t cannot be upgraded. Please note this when ordering.
- 6) Two Isofix places are provided.
- 7) HYMER Connect App also allows remote control via smartphone. Remote access and control via app and associated fees are included for a period of 2 years. After this period, various functions can still be used to a limited extent.
- 8) Only available in combination with Heavy-Duty-Homologation (Euro VI-E).
- 9) With a total mass of 3,500 kg, the trailer load is 2,500 kg for the light chassis and 3,000 kg for the maxi chassis. With a total mass of 4,000 kg (maxi chassis), the trailer load is 2,250 kg (even if the load is reduced to 3.5 tonnes).
- 10) Not available in combination with the optional bed conversion kit for seating group incl. additional upholstery.
- 11) The Backrack+ base carrier is mounted on the left-hand rear door and includes pre-installation of the trailer hitch.
- 12) Sleeping roof and transverse bed conversion kit for seating group incl. additional cushions cannot be used at the same time.
- 13) When ordering the 6 kW diesel warm air heating with 10 litre warm water boiler and 1,800 watt electric bar heater, the compact gas bottle compartment for the 6 kg gas bottle is automatically added.
- 14) A second 80 Ah LFP battery module requires the first 80 Ah LFP battery module.
- 15) TV pre-installation = 1 x power outlet
- 16) The TV preparation shortens the overhead locker above the seating area, creating a gap to the bathroom wall.
- 17) Only available in combination with TV pre-installation / TV-bracket.
- 18) The autonomy package is only available in combination with equipment line Trail or Sport (as already included in the equipment line Explorer).
- 19) A black sleeping roof is the only option for the exterior colour (instead of the vehicle colour).
- 20) Not available in combination with Style package.
- 21) Only available in combination with the exterior color Storm blue metallic.
- 22) Only available in combination with standard or Fiat tyres. Alternative tyres must be retrofitted with Fiat TPMS valves.
- 23) Only available in combination with 16" alloy rims and Heavy Duty homologation (Euro VI-E).
- 24) Only available in combination with Equipment Line Plus, 8-gear automatic transmission and Style package.
- 25) Sleeping roof in vehicle colour is only available in combination with exterior colour Lanzarote Grey, Fer Grey or Campovolo Grey'
- 26) Ayers Rock: The combination of the 5G wifi router with the sleeping roof is not available.
- 27) Sleeping roof in black is only available in combination with exterior colour White, Storm Blue, Artense Grey or Black.
- 28) This option includes the trailer hitch pre-installation.
- 29) The optional opening window in the rear reduces the size of the bed.
- 30) Lifting- and tilting skylight (Heki) not available in combination with sleeping roof, sleeping roof heating or roof AirCon. (Except Grand Canyon S 700 - for this vehicle the combination is available).
- 31) ISOFIX - child seat fixation only available for the seat in central position of the vehicle.
- 32) Only available in combination with lowerable seating group table variant for bed conversion.
- 33) Light package not available in combination with 22" LED TV or TV pre-installation.
- 34) Light package only available in combination with Ambient-Light-System or Living Comfort pack.
- 35) Not available in combination with Diesel heating.
- 36) Only available in combination with automatic gas bottle change over system with Crash Sensor and Ice Ex.
- 37) Not available in combination with optional sleeping roof.
- 38) When fitting the optional Roof AirCon the overall height of the vehicle increases.
- 39) Not available in combination with sleeping roof or lifting- and tilting skylight (Heki).
- 40) Full smartphone integration in the multimedia system (e.g. Apple Car Play, Google Android Auto) can only be guaranteed if the 9" Multimedia SatNav system is installed ex works. Smartphone integration is not possible in the retrofit version.
- 41) Depending on the type of smartphone and the software version, the level of possible smartphone use may vary.
- 42) The peak power describes the maximum power specified by the manufacturer that an inverter can supply for a short period of time, for example to absorb high starting currents or sudden load peaks.
- 43) Only available in combination with the sleeping roof.
- 44) Mercedes-Benz Sprinter 31x chassis with permissible total weight of 3,500 kg cannot be uprated. Please keep this in mind when ordering.
- 45) All Wheel Drive only available in combination with Mercedes-Benz Sprinter 419 chassis variant.
- 46) All Wheel Drive not available in combination with All Season tyres.
- 47) When ordering the optional All Wheel Drive, the overall height increases by approx. 9 cm.
- 48) Only available in combination with Equipment Line Plus or Premium.
- 49) Eco Start-Stop function not applicable with All-Wheel Drive option.
- 50) Not available in combination with All Wheel Drive.
- 51) When uprating the vehicle to 4,100 kg (total permissible gross weight), the trailer load is reduced to 1,780 kg.
- 52) When uprating the vehicle to 4,100 kg (total permissible gross weight), the trailer load is reduced to 2,580 kg.

- 53) 41x CDI (total permissible gross weight of 3,880 kg): Trailer load is reduced to 3,120 kg. When uprating the vehicle to 4,100 kg, trailer load is reduced to 2,900 kg.
- 54) Engine compartment noise reduction insulation and engine / underride protection cannot be ordered at the same time. Only one of these options can be ordered.
- 55) The options "Seat heating and lumbar support for Mercedes-Benz Original seats" and the "Wet Wiper System" can only be ordered in combination.
- 56) Only available in combination with All Wheel Drive.
- 57) Remember that the maximum permissible speed with these tyres is 120 km/h.
- 58) Electric sliding door not available in combination with external gas socket.
- 59) Not available in combination with warm water auxiliary heating.
- 60) Blind Spot Assist only available in combination with the active Distance Assist DISTRONIC+.
- 61) When configuring the sleeping roof, the standard skylights can be omitted (depending on the layout).
- 62) Brackets for awnings feet are supplied loose.
- 63) When ordering this optional extra, standard variant is not included.
- 64) Not available in combination with Carbonline design stickers. The standard decals are omitted with this variant.
- 65) Only available in combination with the optional HYMER Smart Battery System 2.0 extension: 2nd habitation battery module 80 Ah (LFP) incl. additional charger.
- 66) Mercedes-Benz Style package only available in combination with the exterior colours Obsidian black, Tenorite grey or Hightech silver.
- 67) Mandatory optional extra in combination with pop-up roof in vehicle colour.
- 68) The specified mass in running order corresponds to the vehicle with standard equipment and optional extras.
- 69) The trailer load depends on the technically permissible maximum laden mass: With a technically permissible maximum laden mass of 3,500 kg, the trailer load is 3,500 kg. With a technically permissible maximum laden mass of 3,880 kg, the trailer load is reduced to 3,120 kg. If the gross vehicle weight is increased to 4,100 kg, the trailer load is reduced to 2,900 kg.

FOOD FOR THOUGHT!

LEGAL NOTES ON WEIGHT-RELATED INFORMATION

The weight specifications and tests for motorhomes are uniformly regulated throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). We have summarised and explained the key terms and legal requirements from this regulation for you below. Our dealers and the HYMER configurator on our website offer you additional assistance in configuring your vehicle.

1. Technically permissible maximum laden mass

The technically permissible maximum laden mass of the vehicle (e.g. 3,500 kg) is a mass specification set by the manufacturer which the vehicle must not exceed. Information on the technically permissible maximum laden mass of the model you have chosen can be found in the technical data. If the vehicle exceeds the technically permissible maximum laden mass in everyday driving, this constitutes an administrative offence which may result in a fine.

2. Mass in running order

In simple terms, the mass in running order is the basic vehicle with standard equipment plus a legally fixed standard weight of 75 kg for the driver. This essentially includes the following items:

- the unladen weight of the vehicle together with the bodywork, including operating fluids such as greases, oils and coolants;
- the standard equipment, i.e. all equipment items that are included as standard in the factory-fitted scope of delivery;
- the fresh water tank filled to 100 % in driving mode (driving fill according to manufacturer's specifications; 20 litres) and an aluminium gas cylinder filled to 100 % with a weight of 16 kg;
- the fuel tank, which is 90 % full, including fuel;
- the driver, whose weight – regardless of the actual weight – is generally specified as 75 kg in accordance with EU law.

Information on the mass in running order can be found for each model in our sales documents. It is important to note that the value for mass in running order given in the sales documents is a default value determined in the type-approval procedure and verified by the authorities. It is legally permissible and possible for the mass in running order of the vehicle delivered to you to deviate from the nominal value stated in the sales documents. The legally permissible tolerance is $\pm 5\%$. In this way, the EU legislator accounts for the fact that certain fluctuations in the mass in running order occur due to variations in the weight of supplied parts as well as due to processes and weather conditions.

These weight deviations can be illustrated by means of an example calculation:

- Mass in running order acc. to sales documents: 2,850 kg
- Legally permissible tolerance of $\pm 5\%$: 142.50 kg
- Legally permissible range of mass in running order: 2,707.50 kg to 2,992.50 kg

The specific range of permissible weight deviations can be found for each model in the technical data. HYMER makes great efforts to reduce weight variations to the minimum that is unavoidable for production reasons. Deviations at the upper and lower end of the range are therefore very rare; however, they cannot be completely ruled out technically, even with all optimisations. The real weight of the vehicle and compliance with the permissible tolerance is therefore checked by HYMER by weighing each vehicle at the end of the line.

3. Mass of the passengers

The mass of the passengers is set a standard value of 75 kg for each seat provided by the manufacturer, regardless of the actual weight of the passengers. The mass of the driver is already included in the mass in running order (see no. 2 above) and is therefore not included again. In the case of a motorhome with four permitted seats, the mass of the passengers is therefore $3 \times 75 \text{ kg} = 225 \text{ kg}$.

4. Optional equipment and actual mass of the vehicle

Optional equipment (also: additional equipment) includes, according to the legal definition, all optional equipment parts not included in the standard equipment which are fitted to the vehicle under the responsibility of the manufacturer – i.e. ex works – and can be ordered by the customer (e.g. awning, bicycle or motorbike carrier, satellite system, solar system, oven, etc.). Information on the individual or package weights of the optional equipment that can be ordered can be found in our sales documents. Optional equipment in this sense does not include other accessories that are retrofitted by the dealer or you personally after the vehicle has been delivered ex works.

The mass of the vehicle in running order (see no. 2 above) and the mass of the optional equipment fitted to a specific vehicle at the factory are together referred to as the actual mass. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this specification also represents a standardised value. Since the mass in running order – as an element of the actual mass – is subject to a legally permissible tolerance of $\pm 5\%$ (see no. 2), the actual mass may also deviate accordingly from the stated nominal value.

5. Pay-mass and minimum pay-mass

The installation of optional equipment is also subject to technical and legal limits: Only so much optional equipment can be ordered and fitted at the factory that sufficient free weight remains for baggage and other accessories ("pay-mass") without exceeding the technically permissible maximum laden mass. The pay-mass is calculated by subtracting the mass in running order (nominal value according to sales documents, see no. 2 above), mass of the optional equipment and the mass of the passengers (see no. 3 above) from the technically permissible maximum laden mass (see no. 1 above). The EU regulations stipulate a fixed minimum pay-mass for motorhomes, which must remain as a minimum for baggage or other non-factory-fitted accessories. This minimum pay-mass is calculated as follows:

Minimum pay-mass in kg $\geq 10 \times (n + L)$

Where: "n" is the maximum number of passengers plus the driver and "L" is the overall length of the vehicle in metres.

For a motorhome with a length of 6 m and 4 approved seats, the minimum pay-mass is therefore e.g. $10 \text{ kg} \times (4 + 6) = 100 \text{ kg}$.

To ensure that the minimum pay-mass is maintained, there is a maximum combination of optional equipment that can be ordered for each vehicle model. In the above example with a minimum pay-mass of 100 kg, the total mass of optional equipment for a vehicle with four permitted seats and a mass in running order of 2,850 kg should not exceed 325 kg:

3,500 kg technically permissible maximum laden mass
- 2,850 kg mass in running order
- 3*75 kg mass of the passengers
- 100 kg minimum pay-mass
= 325 kg maximum permissible mass of optional equipment

It is important to note that this calculation is based on the default value for mass in running order as defined in the type-approval procedure, without taking into account the permissible weight deviations for mass in running order (see no. 2 above). If the maximum permissible value for the optional equipment of (in the example) 325 kg is almost or completely exhausted, an upward weight deviation can therefore result in the minimum pay-mass of 100 kg being met mathematically using the default value for the mass in running order, although in fact there is no corresponding load capacity. Here, too, an example calculation for a vehicle with four seats, whose real weighed mass in running order is 2 % above the nominal value:

3,500 kg technically permissible maximum laden mass
- 2,907 kg real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)
- 3*75 kg mass of the passengers
- 325 kg optional equipment (maximum permissible value)
= 43 kg actual load capacity (< minimum pay-mass of 100 kg)

In order to avoid such a situation, HYMER further reduces the maximum permissible weight of the total optional equipment that can be ordered on a model-specific basis. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER.

Since the weight of a specific vehicle can only be determined when it is weighed at the end of the line, in very rare cases a situation may arise in which the minimum pay-mass at the end of the line is not guaranteed, despite this limitation of optional equipment. In order to guarantee the minimum pay-mass even in these cases, HYMER will check together with your trade partner and you before delivery of the vehicle whether, for example, the vehicle is loaded up, seats are reduced or optional equipment is removed.

6. Effects of tolerances of the mass in running order on the pay-mass

Regardless of the minimum pay-mass, you should note that unavoidable production-related fluctuations in the mass in running order – both upwards and downwards – have a mirror-image effect on the remaining load capacity: If you order our example vehicle (see no. 3. above), for example, with optional equipment with a total weight of 150 kg, the calculated pay-mass based on the default value for the mass in running order is 275 kg. The load capacity actually available may deviate from this value due to tolerances and may be higher or lower. If the mass in running order of your vehicle is, for example, permissibly 2 % higher than stated in the sales documents, the load capacity is reduced from 275 kg to 218 kg:

3.500 kg technically permissible maximum laden mass
- 2.907 kg real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)
- 3*75 kg mass of the passengers

-150 kg optional equipment ordered for the specific vehicle
= 218 kg actual load capacity

As a precaution to ensure that the calculated pay-mass is actually given, you should therefore take the possible and permissible tolerances for the mass in running order into account when configuring your vehicle.

We also recommend that you weigh the laden motorhome on a non-automatic scale before each journey and, taking the individual weight of the passengers into account, determine whether the technically permissible maximum laden mass and the technically permissible maximum mass on the axle are observed.

Please note!

This price list describes the series status at the time of publication. Despite careful checking of the content, printing errors can not be ruled out completely. We reserve the right to make equipment changes or product improvements. Before signing a contract, please ask one of our approved HYMER dealers about the current product-, equipment and price.

Some vehicles are partly shown with optional extras that are available in the current applicable price list and are available at extra cost. The decoration shown is not supplied by HYMER.

The data complies with European homologation regulations which may change by the time of the vehicle purchase or delivery. Your HYMER dealer will gladly provide you with information regarding these changes as well as the standard scope of delivery.
